

## The Push Back to Governments Outlawing People Leaving their LGBTIQ Lives.

### Are You Ex LGBTIQ? We Need Your Help.

Our governments are moving to pass laws that will make it illegal for people who have unwanted same-sex attraction or unwanted Gender Dysphoria to get any assistance leaving those lives. Governments are telling the public and specifically people in the LGBTIQ community that they do not, they cannot, change. They tell them that medical doctors, professional counseling, pastoral care, prayer, parents wanting to seek help for their sexually confused kids, or even talking to someone for their advice on how to deal with such unwanted feelings is only ever damaging and they have called it "Conversion Therapy".

### Your Investment In The Human Rights of Others.

We believe that every human being has rights, and that when governments pass laws stopping people from seeking their personal happiness, it is an abuse of those human rights. Here is your opportunity to tell the politicians and lawmakers what your life was like, how having left your LGBTIQ life behind has changed you and what assistance you received to get here.

## How You Can Help Others.

CAUSE has an association with a number of professional people who are gathering information to produce a paper to give to politicians to counter the dishonesty that governments are promoting. It is only people like you who have come out these lives, by sharing your stories of change, who can stop governments oppressing vulnerable people. To do that our professionals need your story of change. To be effective and help others with unwanted feelings we are looking for hundreds of stories of change. This makes what you have to say incredibly important.

We have created a website portal that will allow you as a person who has, or who had unwanted same-sex attraction or unwanted Gender Dysphoria to log, in answer a short questionnaire that provides statistical data and then record your story of change about having lived same-sex attracted or Gender Dysphoric lives. You can explain what your attractions and feelings about yourself were, how those feelings affected you and what you did about it. Here you have the opportunity to tell the politicians how change has impacted on how you live your life now.

You can do that by lodging your story of change as a video, in a voice recording, or a written document. If you want to, we will show you how to blur your face and mask your voice. Although in your registration we will need a record of your real name for verification, you have the option of inserting a Nickname (alias) into your account by which to identify your stories of change. Your identification will be kept confidential unless you give us permission to share it.

Please go to our website. You can watch a 7 minute explanatory video there and start the registration process.
